Submission points

Point 1.1

1: Tell us what you think of the proposed Significance and Engagement Policy. Choose from one of the three options in the dropdown list and then tell us more if you have any comments.

Answer

I agree with the proposal

2: What do you like about the proposal?

Answer

It clearly sets out the processes used and how council decides how to engage with the community. I like the use of the IAP2 engagement spectrum. The scenarios are helpful for understanding how it might work in real life. Everything is well set out and clear. I agree with the update that makes it clearer what council will do (i.e. follow s82 of LGA) rather than just "whatever it thinks best".

3: What don't you like about the proposal?

Answer

4: Tell us about your thoughts on the proposal
